ALL-IN-ONE HEAT PUMP

FEATURES.

EFFICIENCY

Neopower heat pump technology makes efficient use of the heat in the surrounding air, even at temperatures as low as -7°C .

Our heat pump can convert 1kW electricity into 4kW of heat.

CONSERVATION

R290 natural refrigerant, low ozone-depleting properties and extremely low GWP make R290 one of the most climate-friendly and cost-effective refrigerants on the market.

SAVINGS

Make the most of your solar PV system.

Reduce energy costs up to 3 times compared to conventional electric and gas water heaters.

Eligible for heat pump water heater rebate, such as STC, VEEC and ESC.

RELIABILITY

The smart touch screen makes controlling the system and changing settings a hassle free experience.

CONVENIENCE

Integrated WiFi function with free App can control and monitor the heat pump remotely.

ABOUT US.

Established in 2010, Neopower leads the way in the solar hot water industry. Thousands of hot water systems have been installed all over Australia.

Neopower's comprehensive range of evacuated tube and flat panel solar hot water includes split systems (tank on the ground) as well as roof-mounted systems. Neopower solar hot water systems are the perfect energy-efficient solution for any application.

Neopower systems are eligible for multiple Government incentives, including Small-Scale Technology Certificates (STCs), Victorian Energy Upgrades Program, Solar Victoria Hot Water Rebate, and the NSW Energy Saving Scheme.

Neopower Heat Pump Systems are cost effective, highly efficient and will provide your whole family with hot water.
